IGLOO (IB'I TECHNOLOGY) – Innovative Decorative Lighting System

What is the Igloo Constructor?

A unique technology of artificial ice blocks for urban decoration with no analogues. You have the opportunity to be among the first to use it. The system allows you to create any decorative structures – from small figures to large-scale ice cities with interactive elements – and requires no special maintenance. By day, the structures look like real ice; by night, they transform into impressive light installations.

MAIN ADVANTAGES:

The uniqueness and key advantage of our technology lies in its scalability – it allows you to build structures of any complexity and size. This makes it possible to design custom projects for any purpose, while the high-quality materials and components ensure durability for objects of all dimensions – from a small figure to a full-scale “ICE CITY.” The constructor is easy to assemble and operate; its intuitive modular system allows anyone to expand and transform installations with new elements.

Lighting: The LED system is mounted inside a steel base, enhancing visual appeal and attracting even more attention. Optionally, we can equip any object with programmable lighting – simply choose the color and operating mode.

ADDITIONAL BENEFITS:

- Exclusivity: proprietary innovative technology available only from us
- Durability: factory warranty up to 10 years
- All-season use: operates year-round under any weather conditions
- Modularity: can be transformed and expanded annually with new components
- Low maintenance: simple replacement of light modules

TECHNICAL SPECIFICATIONS:

- Block material: high-grade PC Carbomix-20 UV OD – frost-resistant, flame-retardant, UV-stable
- Base: ST3 steel with enhanced corrosion resistance
- Lighting: configurable LED system with adjustable color and operating modes

APPLICATION AREAS:

Ideal for decorating city squares, parks, promenades, shopping centers, and other public spaces. It draws the attention of both residents and visitors, creating a unique festive atmosphere.

EASY OPERATION:

Assembly of Igloo is extremely simple – even a child can do it, and for adults it becomes an engaging creative process. The lighting modules are housed within a steel base; replacing them is as easy as changing a light bulb in a hallway.

SERVICES PROVIDED:

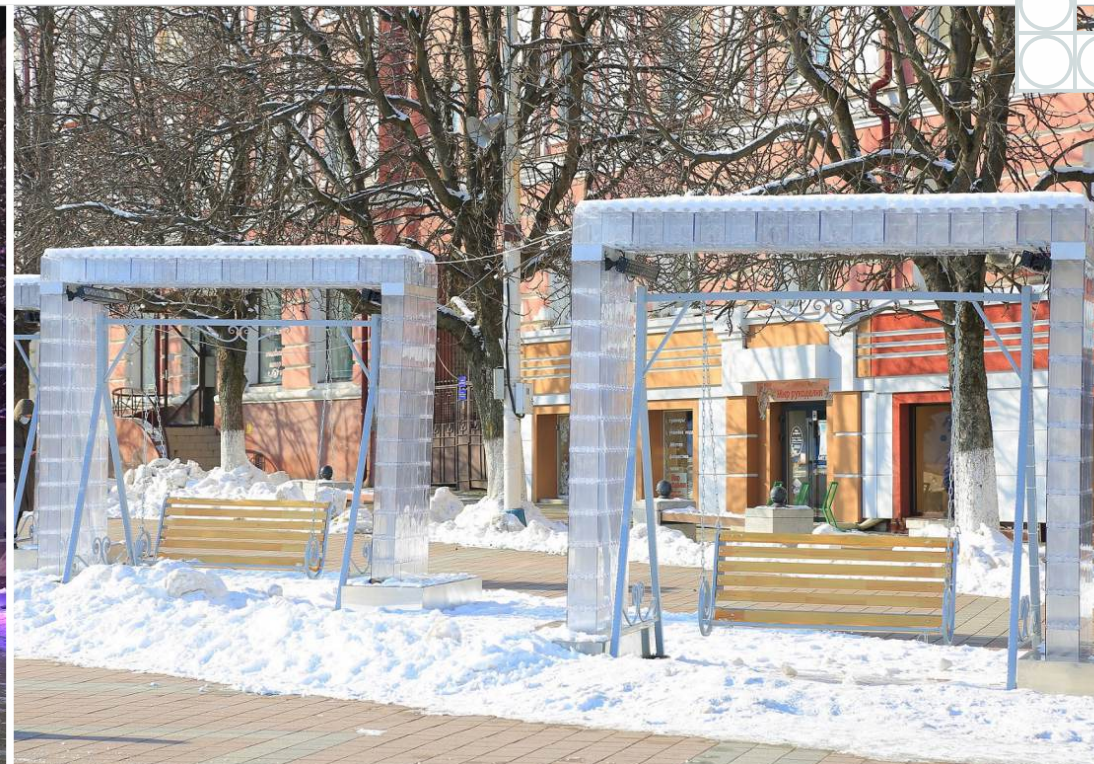

Our company offers a full range of services for rental, design, installation, maintenance, and storage of Igloo structures.
