About the company

We produce inflatable figures in Russia at our own production facility since 2000. Inflatable products are used for advertising and decorative purposes. Over the past 25 years, the company has produced figures for a large number of individuals and for major festivals and events. For example:

- the Russian Drift Series,
- the International Sports Games for Children from Asia,
- the India Day Festival,
- the Summer in Moscow Festival.

Advantages

Tailor-made sewing

The cost of the product, design, and branding are made individually, taking into account all the nuances and requirements

Individual design

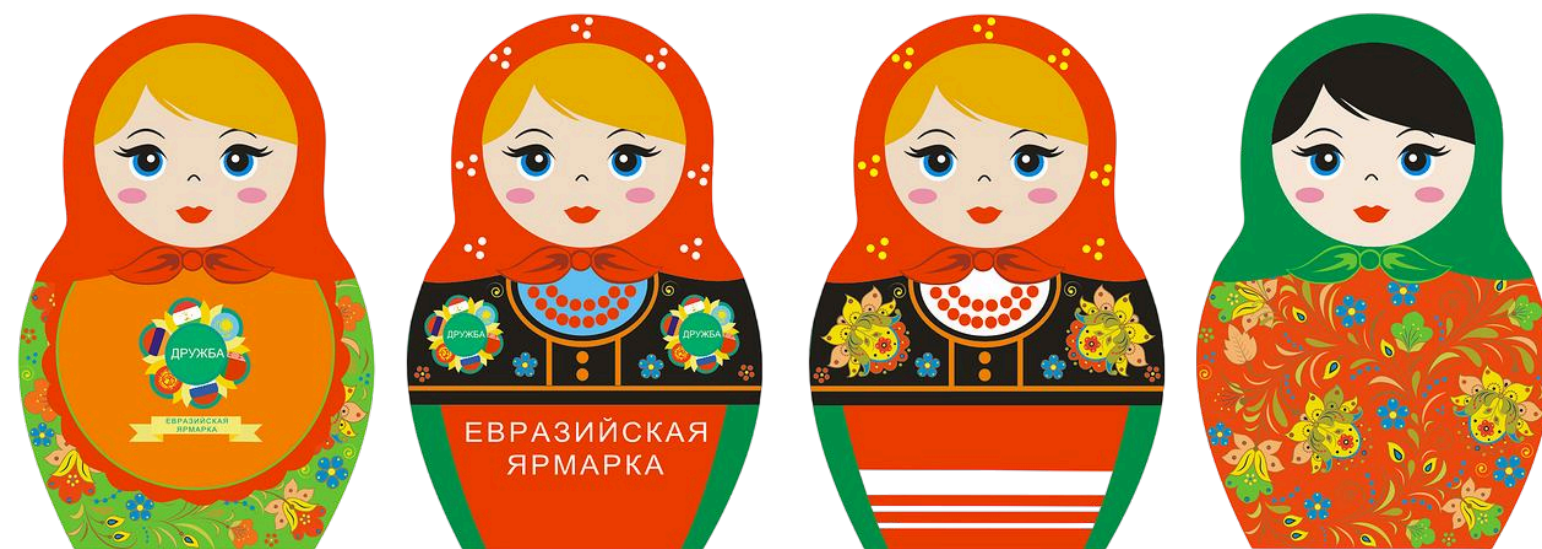

Several types of design and adjustments before work begins

In-house printing

The company has its own printing equipment. This allows for detailed customization of colors and content on banners and prints on parts

The highest quality materials

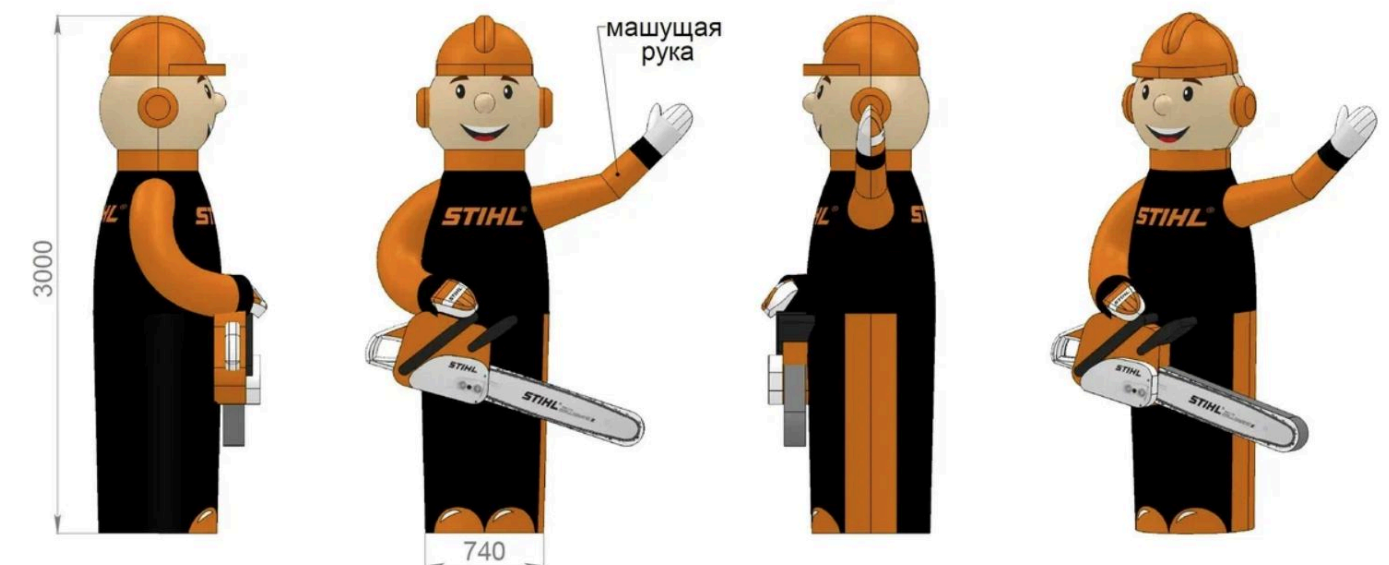

Oxford 300 PU 1000, PU 2000, and Oxford 600 PU1000

An example of different designs

Printing equipment

An example of an inflatable figure layout

Exploitation

Temperature

The figures can be operated at any time of the year at temperatures between -30 and +40 °C

Wind resistance

The figures can be operated in winds up to 7 m/s

Durability

The inflatable figures are resistant to cuts

Inflation time

The figures take 5-10 minutes to inflate, depending on their size

Electricity

Access to a 220-volt power supply is required

Fasteners

Location for fasteners
(anchors, sandbags, stakes)

A fan that plugs into a power outlet and inflates shapes

The eyelets (loops) that secure the figure
